DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 08/31/2009 have been fully considered but they are not persuasive. The following reasons are why:
2. Applicants admit on the record that Morris (WO02/33393) "does disclose, by structure and by name a variety of sensor materials to be used for gas analysis." Applicants argue 1). Morris does not however, teach or suggest the specific groups or materials recited in Claims 21 or 22; 2). None of the specific groups of materials recited in 21 or 22 is identically described in Morris as a whole group; 3). There is no discussion in Morris of which materials might possibly be grouped with which other materials for use to make a gas analyzer device; 4). Morris does not give the artisan sufficient guidance about the desirability of grouping any particular materials with certain others to justify classifying Morris as a reference that presents the artisan with a finite number of solutions from which to choose when constructing a group of materials to use in a gas analyzer device (See Remarks filed on 08/31/2009; Page 12 of 13)."
3. The Examiner respectfully disagrees.
4. First and foremost: The arguments of counsel cannot take place of evidence in the record (especially, since the prior art reference relied upon by the Examiner has a common inventor with the instant application). See MPEP 716.01(c) II.
